High Performance 2 Wings and 3 Wings Diamond Compression cutters 10mm and 12mm

◆ POWERCUT SERIES NESTING

Enjoy a long life tool without compromise finish and speed, our Powercut Diamond Line last upto 50 times longer compared to standard Carbide tools on the market. We highly recommend the use of BMC Hydro line to complement any Diamond Tool

Description	Price
Diamond Compression Cutter POWERCUT4N 10×22 Z3+3	\$265
Diamond Compression Cutter POWERCUT5 12×22 Z2+2	\$265
Diamond Compression Cutter POWERCUT4N 10×22 Z3+3	\$265
Diamond Compression Cutter POWERCUT5 12×22 Z2+2	\$265

SHAKER DOOR KITS

BMC EXTREME DIAMOND

All our Diamond tools have a durability up to 50 times traditional carbide/turnover knife.

Description	Price
DIAMOND CUTTERS	
Diamond Hogger 40mm Usable Length 15mm	\$620
Diamond 90 Degrees Cutter Usable Length 22mm	\$465
Diamond Radius 2mm Bevel Cutter	\$188
Diamond J Pull Cutter	\$430
RAINBOW® 3 TIMES LIFE	
22.5 Degrees Cutter (Sharp Profile) RAINBOW®	\$141
3mm Down Cut Usable Length 12mm (Corner Cleaner) RAINBOW®	\$58.5
8mm Down Cut Usable Length 22mm (Edge Cleaner) RAINBOW®	\$82.5

BMC TOOLING MOST USED BLADES

STANDARD HW BLADES AND DIAMOND EXTREME BLADES DIAMOND

Our extreme diamond blades have a life expectancy of up to 50 times that of traditional carbide blades

Description	Price
DIAMOND RANGE PANEL SAW	
Panel Saw Blade 300×3.2-2.2×30 Z96 DIAMOND	\$1095
Panel Saw Scriber 120x.3.1-4.3×20 Z=24 DIAMOND Conical	\$495
Bundle Main Blade plus Scriber for Panel Saw DIAMOND	\$1500
DIAMOND RANGE BEAM SAW	
Beam Saw Main Blade 400X4.4X3.2X80 Z72 DIAMOND	\$1250
Beam Saw Scriber 160X4.6/3.4X2.2X55 Z 36 DIAMOND	\$700
STANDARD CARBIDE BLADES PANEL SAW	
Panel Saw Blade 300×3.2-2.2×30 Z96 HW	\$180
Panel Saw Scriber 120x.2.8-3.6×20 Z=12+12 HW With Spacers	\$150
Panel Saw Scriber 120x.3.1-4.3×20 Z=24 HW Conical	\$135

DIAMOND CUTTERS SERIES FOR HPL

POWERCUT 3 HPL

Meticulously crafted with Italian precision, renowned for unparalleled quality and designed for enduring longevity.

Description	Price
POWERCUT 3 DIAMOND CUTTER WITH ALTERNATE CUT POS./NEG. Z4 HDM BODY WITH ROUGH/FINISHING CUTTING TIPS	
Powercut3 D10×12×10 Z4 Panel Thickness from 8 to 11mm	\$278
Powercut3 D12×19×12 Z4 Panel Thickness from 12 to 16 mm	\$394
Powercut3 D12×24×12 Z4 Panel Thickness from 16 to 21mm	\$453
Powercut3 D12×24×20 Z4 Panel Thickness from 16 to 21mm	\$625
Powercut3 D12×28×12 Z4 Panel Thickness from 22 to 25mm	\$506
POWERCUT 2 DIAMOND CUTTER WITH ALTERNATE CUT POS./NEG. Z2 HDM BODY WITH ROUGH/FINISHING CUTTING TIPS	
Powercut2 D12×19×12 Z2 Panel Thickness from 12 to 16mm	\$287
Powercut2 D12×24×12 Z2 Panel Thickness from 16 to 21mm	\$320

BMC TOOLING EASY HYDRO BENEFIT

Description	TENDO E compact	ER collet chucks
Run-out-accuracy - Even cutting action - Influences damping and balance grade - Cost Reduction	++ 0.003mm (Measured at 2.5x 0 permanent)	- 0.01 - 0.02 mm
Process Reliability - Permanent run-out accuracy	++	-
Torque at Ø 20mm - Highest volume machining - Process reliability	++ up to 900 Nm	0 220 Nm
Radial Rigidity - Higher part geometry accuracy at the work piece at rough machining - Lower cost for remachining	++	-
Damping - Increased tool service life - Prevents the machine spindle from damage - Lower costs - for remachining - Avoiding chatter marks	++	0
Flexible by using intermediate sleeves - Enlarged field of applications - Cost of reduction - Higher clamping force at given shafts - Peripheral cooling	++	0 (Collet Chucks)
Clamping of all shafts (Weldon, Whistle Notch, ...)	++	++

Description	TENDO E compact	ER collet chucks
Handling and Operability - No operator training necessary - Avoid clamping errors - Low set-up costs	++	+
Resistant to dirt - No maintenance - Lower costs	++	-
Exact length pre-adjustment	++	-
Necessary peripheral equipments (Regarding costs)	++ Allen Key	0 Hook Wrench + Assembly Device

- Up to 300% longer tool life*
- Highest torques, now up to 2,000 Nm with dia. 32 mm in dry clamping conditions, 900 Nm with an oil tool shank
- Best surface finishes – no chatter marks
- Minimized noise emission
- Reduced tool costs
- Extremely fast tool change without peripheral equipment
- Long-lasting run-out and repeat accuracy < 0.003 mm

* Verified in a study by the wtk Institute of Production Technology at the Karlsruhe Institute of Technology (KIT).

TIENDO E compact

Excellent vibration damping

The hydraulic system absorbs vibrations, assures smooth running, and the best workpiece surfaces.

Your benefit:

High surface quality, the machine spindle is protected from damage, and service life is increased.

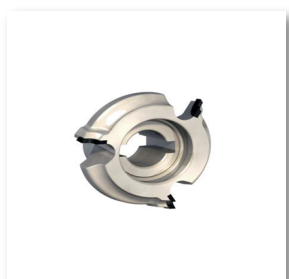

BMC TOOLING MOST USED EDGE BANDER TOOLS

PREMILLERS, CUTTERS AND REPLACEABLE KNIVES

Description	Price
PREMILLER	
Premiller 100X54.5x30 Z2 LH or RH AXIAL 30°	\$750
Premiller 100X54.5x30 Z3 LH/RH AXIAL 30°	\$900
Replaceable tips (Leitz Type)	\$65
All Different Heights and Diameters available upon request (HPL DESIGNED type also available)	POA

SCM EDGE BANDER TRIMMER CUTTERS	
Trimmer cutter for SCM K230-K360 ME35-40 RH or LH D55,5X21 Z3 Solid Carbide tips	\$290
Trimmer cutter for SCM K560 HP D62X30 Z3 RH or LH Solid Carbide tips	\$650
Trimmer cutter for Stefani HP D62X30 Z4 RH or LH Solid Carbide tips	\$700
Trimmer cutter for SCM K230-K360 ME35-40 RH or LH D55,5X21 Z3 Diamond tips (up to 50 x increased life compared to Carbide tips)	\$480
Trimmer cutter for SCM K560 HP D62X30 Z3 RH or LH Diamond tips (up to 50 x increased life compared to Carbide tips)	\$850
Trimmer cutter for Stefani HP D62X30 Z4 RH or LH Diamond tips (up to 50 x increased life compared to Carbide tips)	\$950

Description	Price
END TRIMMERS BLADES	
Circular Blade D125X3.2x30 Z24	\$145
Circular Blade D115x3.2x30 Z30	\$145
REPLACEABLE KNIFE AVAILABLE FOR ANY UNIT MODEL AND IN STOCK	TBA

BMC TOOLING TURBOFAN DUST AND CHIP EXTRACTOR FOR CNC NESTING

Description	Price
TURBOFAN TOOL HOLDER ER32	\$300
TURBOFAN TOOL HOLDER ER40	\$300
TURBOFAN TOOL HOLDER EOC25	\$300

ALL PRICES IN THIS CATALOGUE ARE EXCLUSIVE OF GST

- ◆ Collet nut with chip extraction turbine applicable on tools holders HSKER32 HSKER40 EOC25 (DIN6388) and HYDRO ETP. The turbine replaces the standard collet nut . Maximum extraction of the chip on the worked surface. Recommended for nesting operations with sacrificial panel where the chips cannot evacuate in the low part of the panel. The extraction of the chip allows an increase in durability and finishing of the tool. The alloy body of the turbine is coated to increase hardness and a steel ring is fitted inside. Possibility to use it from 10000 rpm up to 20000 rpm. Workable materials: chipboard, mdf, Corian, HPL , Plywood , Composite materials.

Note: Use the turbine as possible as near the panel.

BMC TOOLING CNC ESSENTIAL EASY SERIES

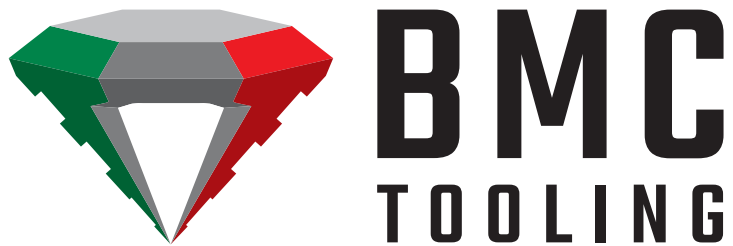

Description	Price
BMC Easy Torque Wrench 14*18mm 40-200Nm	\$235
BMC Easy Torque Interchangeable Head ER40-EOC25	\$65
BMC Easy Torque Interchangeable Head ER32	\$65
BMC Easy Clamp HSK	\$195
BMC Easy Clamp ISO30	\$195
BMC Easy Clean ER32	\$10
BMC Easy Clean HSK	\$30
BMC Easy Clean ISO	\$30
BUNDLE EASY ESSENTIAL (Easytorque + Easyclamp + interchangeable head a Easy clean set)	\$500
